

Online Weather Center

Online Weather Center is a web-based visualization tool that depicts live weather information from your WeatherBug® Tracking Station. You and your customers have immediate access to this data via a WeatherBug hosted web page, which is customized with your organization's logo.

Bring your web site to life with real-time weather data. Turn your website into a source of valuable information for visitors and potential customers. Empower your operational decisions with a centralized view of all weather data collected from your local WeatherBug Tracking Station and Camera.

Online Weather Center includes:

LIVE CONDITIONS

- Temperature
- Wind Direction, Speed, Gusts
- Pressure
- Relative Humidity
- Daily Rainfall
- Heat Index, Wind Chill

WEATHER ALERTS

- Location Based
- Visually Depicted

HISTORICAL OBSERVATIONS

- Daily / Monthly Data Tables
- Interactive Graphing Tool
- 27 Weather Parameters

RADAR AND SATELLITE MAPS

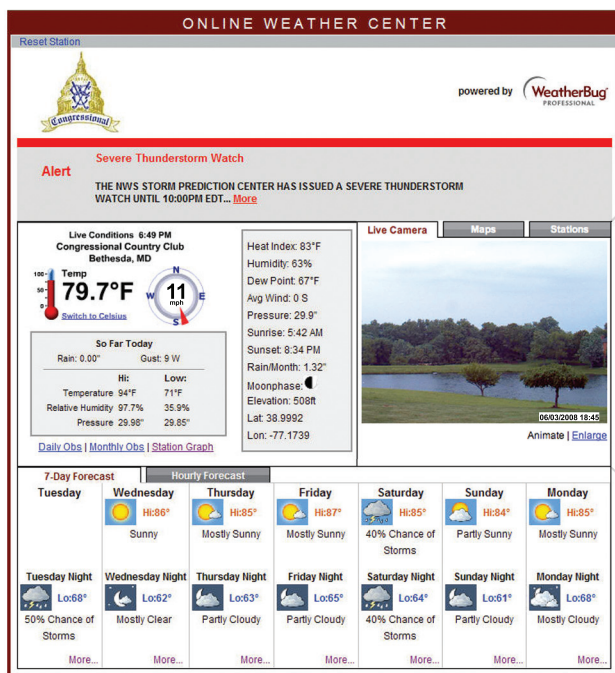

- Enlargement & Animation Capabilities
- Doppler, Infrared, & Visible Satellite Imagery

CAMERA IMAGERY
